Professor V.F. Voino-Yasenetsky Krasnoyarsk State Medical University

Dear colleagues!

We are pleased to announce that

Integration of Medical and Pharmaceutical Education, Science and Practice (University Pedagogy) – the Fifth International Scientific and Pedagogical Forum
will take place from February 4 to 6, 2026.

Aim: to provide a wide range of interested specialists with an opportunity to exchange theoretical knowledge, research results and teaching experience in order to improve the quality of medical and pharmaceutical education based on the integration of science and practice.

Format: hybrid (in-person and online).

As part of the Forum, the following contests and academic competitions will be held:

- **“First Aid”**, the Ninth All-Russian Competition of practical skills in First Aid for 4th-6th year students of medical specialties.
- **“Problems of University Pedagogy from Students’ Point of View”**, the Fifth All-Russian Competition.
- **“The Best Teacher of a Course in English”**, the Fourth All-Russian Competition.
- **“Pedagogical Inspiration”**, the Fifth All-Russian Project Competition.
- **“Pedagogical Stand-up: My First Professional Experience”**
- **“Pedagogical Dictation”**
- **“My country is Russia”**, the Third All-Russian Olympiad for the students of 1-2 years of higher and secondary vocational education.

The symposia, sections, round tables, and workshops will address the following topics:

- Current Challenges in Pedagogy Within Modern Medical Education.
- Knowledge Algorithms: How Artificial Intelligence is Transforming Medical Pedagogy.
- Secondary Medical and Pharmaceutical Professional Education. The Role of Vocational Training Institutions in Addressing Staff Shortages: From Career Guidance for Applicants to Graduate Employment.
- International Cooperation and Language Training in the Multicultural Educational Environment of a Medical University.
- Organizational and Pedagogical Aspects of the Internationalization and Export of Medical Education.
- Experience and Trends in Pharmaceutical Education.
- Residency: The Territory of Professional Formation.
- Technology-Rich Education.
- The Continuing Professional Development Ecosystem: Transformation of Medical Education.
- Medical Career: Launch, Development, Mastery.
- Experience in Implementing Youth Policy at Universities in Krasnoyarsk.
- Experience and Challenges in Student Educational Work at Universities.

Continuing Professional Development Course Programs:

- Generative Artificial Intelligence in the Work of a Modern University Lecturer (18 academic hours).

The Organizing Committee invites faculty and staff from higher and secondary medical and pharmaceutical education institutions in Russia and abroad, as well as all interested specialists, to participate in the Forum's work.

Acting Rector

D.V. Cherdantsev
